JOIN THE TEAM NOW!!

The challenge of iGEM is to design new genetic machines, by assembling standard parts, the BioBricks, and to operate them in living organisms. Examples are logic circuits, clocks, switches and sensors. After the successes of past years, TU Delft is going to join iGEM 2010, and we are looking for new enthusiastic team members!

Are you...
- an undergraduate in Engineering, Computer Science, Physics or Life Science?
- creative, enthusiastic, results-driven and team player?
- available for working in Spring/Summer 2010?

...THEN ...CONTACT US NOW !!
